NANO DELAY / ASSEMBLY MAP

Revision A prototype · component side · 50.8 × 88.9 mm board

Labels identify component locations; this is not the printed silkscreen.

WIRING AT A GLANCE

J1: 9 V power · J2: input · J3: output · J7: momentary footswitch

J4: time · J5: feedback · J6: mix · J8: LED · JP1: removable power link

Square pad = pin 1. See README for pin assignments and polarity.

Remove JP1 before USB. Use MCP6002 at U3 and 23LC1024 at U4.

Some reference labels are on the board reverse. Use this map when assembling.

Unbuilt design: firmware, bench tests and enclosure fit remain to be validated.
